However, when you want to replace a different control panel theme, you might need to modify this file in order to make the necessary changes. How can I do this? The system files are the ones that you would normally find in a computer's disk system. These are the files that help Windows run the software and applications that you need. There is a standard software package that comes with every Windows version, but it doesn't have the ability to modify all of the files in the system's files folder, such as the ones for the folder named C:\WINDOWS. 77a5ca646e
